

Job Description: Senior Data Analyst

Last Updated: Prior legacy version

About Northbridge Advisory Partners

Northbridge Advisory Partners is a growing professional services firm. We help clients solve complex data challenges.

The Role

We are seeking a Senior Data Analyst to join our team. You will work remotely 100% of the time and report to the Data Practice Manager.

Responsibilities

- Clean and process large datasets using SQL and Excel.
- Build dashboards in Tableau or PowerBI.
- Write Python scripts for data transformation.
- Present findings to internal team members.

Requirements

- 3+ years of data analysis experience.
- Strong SQL and Excel skills.
- Experience with legacy on-premise data warehouses.
- Excellent written communication.

Note from HR Director (prior legacy review): This description is extremely outdated. It references the legacy grading system and tools we no longer use as primary platforms. Needs a complete rewrite for GenAI/LLM era.
